Exchange Server 2007

- ✦ Install, configure, and administer Microsoft Exchange Server 2007 Service Pack 1
- ✦ Handle real-time messaging, collaboration, and unified messaging
- ✦ Optimize availability, performance, reliability, and security

Richard Lockett
William Lefkovic
Bharat Suneja

Foreword by
Scott Schnoll, Microsoft

“I tried hard to find customer questions that I received on managing Exchange 2007 anti-spam that remain unanswered by this book, but this book covers everything. All essential topics in spam filtering for Exchange 2007 are discussed with impressive attention to detail and lab validation. The authors’ insistence on engaging Exchange engineers in understanding the inner workings of the messaging hygiene pays back!”

—Mihai Costea,
Senior Program Manager of Exchange Server 2007,
Microsoft Corporation

“There are several great books when it comes to Exchange Server 2007. This one stands out in several ways from the rest, though. The book provides both breadth and depth when it comes to the many components of Exchange, which is a very tough balancing act. I love the writing style and the technical content hits the mark. I will certainly be recommending this book to others.”

—Russ Kaufmann
MVP - Windows Clustering
MCT, CTT+, MCSE: Messaging, Security
MCITP: Enterprise Messaging Administrator
ClusterHelp.com, a Microsoft Gold Certified Partner

About the Authors

Richard Luckett is the president of SYSTMS of NY, Inc. (<http://systmsny.net>), a leading Microsoft Gold Partner providing professional services, managed services, and training solutions. Richard is an MCSE, MCT, MVP, MCITP, and MCTS with specializations in security and messaging and over 15 years of experience as an IT professional. Richard is a Microsoft Certified Trainer with more than nine years Exchange Server instructional experience. He is one of fewer than 120 experts worldwide awarded the Exchange Most Valuable Professional distinction by Microsoft. Richard is an accomplished author and speaker who coauthored *Administering Exchange 2000 Server* by McGraw-Hill and is the course director of seven best-selling Exchange courses for Global Knowledge, Inc. Richard is a contributor to the SearchExchange.com website at TechTarget and is their resident Exchange expert for questions on spam and security.

William Lefkovics, MCSE, A+, BSc, works as the Technical Director for Mojave Media Group, based in Las Vegas, Nevada. He started working with Microsoft products more than 10 years ago and was first certified in Exchange 5.0. He has been a Microsoft Exchange MVP since 2001. While working as a writer, presenter, trainer, and consultant, William contributes articles for Exchange and Outlook Pro VIP online (<http://exchangeprovip.com>) and Slipstick.com's *Exchange Messaging Outlook (EMO)* newsletter. He was also a coauthor for the book *Configuring Exchange 2000 Server* by Syngress Media. Most recently, William is speaking at Exchange Connections in Orlando in April 2008.

Bharat Suneja is Principal Exchange Architect at Zenprise (www.zenprise.com), maker of automated troubleshooting and monitoring software for Microsoft Exchange and BlackBerry environments. Bharat is an MCSE (+Messaging +Security), MCT, and MVP (Exchange Server), with over 10 years of experience as an IT professional. He actively participates in Microsoft communities as a writer, presenter, and technical contributor. Bharat publishes the Exchangepedia Blog (exchangepedia.com/blog), a popular destination for IT professionals, Exchange administrators, and architects from over 150 countries. He contributes to TechTarget's SearchExchange.com.

About the Contributing Authors

Rev. Dr. Bradford S. Werner, Technical Evangelist, is the president of Werner Training and Consulting, Inc.—a software development, consulting, and training business in Phoenix, Arizona. Brad has over 27 years of experience in systems engineering and software development. He is an expert with embedded systems development and systems integration. Besides embedded systems, Brad has developed operating systems, compilers, and other software for UNIX, Mac, and of course, Windows systems. He's a best-selling author whose software, books, and award-winning course materials have been used worldwide. Windows-related courses include a dozen courses on Windows Server and security topics, and a course on the automation of Windows Server 2008 with Windows PowerShell. Brad holds a B.S. in computer science, completed half of a masters in telecommunications, and holds a doctorate in metaphysics, as well as other certifications.

Nick Cavalancia, MCSE, MCT, MCNE, MCNI, is an accomplished consultant, trainer, author, columnist, and speaker and has been in the IT industry for over 15 years, having designed Exchange environments for some of the most well-known companies today. He has contributed to over a dozen books on topics such as Windows, Active Directory, SQL Server, and Exchange, and is the coauthor of *Exchange 2000 Server Administration: A Beginner's Guide* and *Exchange 2000 Server: The Complete Reference*. Nick currently serves as Vice President of Product Marketing for ScriptLogic Corporation, where he assists in driving innovation and leads the evangelism of ScriptLogic solutions.

Pat Richard is a Messaging Architect for Analysts International, a Microsoft Gold Partner. Pat has been working with messaging environments since the MS Mail days, and spends a majority of his time designing and implementing enterprise messaging solutions based around Microsoft Exchange. Complex migrations and implementations, as well as large scale upgrades, are his specialty. Several years ago, he was given the Microsoft MVP award for his contributions to the Exchange community. Pat continues to be active online, assisting others with Exchange-related issues.

About the Technical Editors

Rodney Fournier has been working in the field for over 22 years. He has been recognized by Microsoft as an MVP in Windows Clustering and is one of six people in the world to receive this distinction. Currently, Rodney is a Principal Computer Scientist working onsite at NASA – Marshall Space Flight Center (MSFC). He works in the NASA Data Center (NDC) Architect and Engineer's group of IT Security. His focus is on Windows Server 2003 Active Directory services, clustering technologies, Exchange 2003, SQL 2000, and infrastructure design.

Rodney also owns and runs Net Working America, Inc. (www.nw-america.com). As the President and Lead Consultant, he does public speaking and technical editing, as well as authors books, publications, and training courses. He has been a Microsoft Certified Trainer for the past 11 years. Rodney has been a source of information in many articles written by other authors and has been quoted in the industry press on many different topics regarding IT. He is also involved in www.ClusterHelp.com, where he teaches, writes the labs, and helps with the courseware.

Steve Music has worked in the IT industry since 1988. He has provided support to a vast range of organizations, including small sole proprietor businesses, international corporations, nonprofit groups, and U.S. Government agencies. His experience as a system administrator for e-mail began in 1998 with Lotus Domino R4 and Exchange 5.5. At the time this book was published, he was the contract Team Lead for messaging at the Bureau of Indian Affairs, where his responsibilities included the planning and deployment of Microsoft Exchange 2007. Steve lives in Virginia with his wife and two children.

Part I Exchange Server 2007 Fundamentals

1 Introduction to Exchange Server 2007	3
Demystifying Exchange Server 2007	4
Defining Exchange Server 2007	4
A Brief History of Exchange Server	4
Messaging vs. Collaboration	6
Roll Out the Red Carpet: Here Come the New Features	7
New Features List	7
Client Benefits	8
Administrative Benefits	8
What Exchange Server 2007 Is Not	9
Where Did That Go?	9
Replaced Features	10
Decommissioned Features	11
Deemphasized Features	12
Information Workers' Delight	12
Outlook 2007 Improvements	13
OWA 2007 Improvements	13
Mobility Improvements	14
New Unified Messaging	14
Categorical Changes	15
Sixty-Four-Bit Computing	15
Server Roles	15
Continuous Replication	16
Security	16
Unified Messaging and Unified Communications	17
Paradigm Shift in Management	17
Management Architecture	18
Exchange Management Console	19
Exchange Management Shell	20
Automate IT	21
Exchange Server 2007 Service Pack 1	22
OWA 2007 Improvements	22
Operational Improvements	22
Security and Availability Improvements	23
Summary	23

2	Active Directory Integration	25
	Directory Services	25
	Distributed Computing	26
	X.500	26
	Lightweight Directory Access Protocol: LDAP	27
	Active Directory Services	27
	The First Microsoft LDAP Directory	27
	Windows 2000 Active Directory Services	28
	Windows 2003 Active Directory	28
	AD vs. Other Directory Services	29
	Logical Active Directory Components	30
	Forests	30
	Domains	31
	Trees	31

Exchange Administrator Benefits	66
Summary	68

Part II Designing and Deploying Exchange Server 2007

4 Installing Exchange 2007	71
Pre-installation Review	71
Preparing the Server	72
System Requirements	72
Virtualization	74
Determining Role(s)	75
Choosing the Appropriate OS	75
Installing and Configuring Prerequisite Software	75
Exchange Best Practices Analyzer (ExBPA)—Exchange 2007 Readiness Check	77
Permission and Security Requirements	78
Preparing Active Directory	78
Preparing for Coexistence	78
Preparing the Schema	79
Preparing the Domains	81
Verifying That Active Directory Is Prepared	82
Verifying That a Domain Is Prepared	84
Multiforest Considerations	85
Installing Exchange 2007 Server	85
Installation Types	86
Typical Installation	86
Custom Installation—Graphic Interface	87
ExSetup.exe	95
Management Tools Installation	95
Install Exchange 2007 into Existing Exchange 2000/2003 Environment	95
Provision Server and Delegate Setup	96
Edge Transport Server Installation	97

Exchange 2007 Service Pack 1 Installation	99
Command-line Upgrade or Installation	99
Automated Installations	100
Setup.com–Power Tool	100
Unattended Installations	102
PowerShell Installations	103
Finalizing Installations	103
Post-installation Task List	103
Running the Exchange Best Practices Analyzer (ExBPA)	103
Verifying Installation Success	104
Troubleshooting Installation Problems	105
Uninstalling Exchange 2007	105
Removing Exchange Server Roles	105
Removing Exchange 2007 from a Server	107
Summary	107
5 Transitioning and Migrating	109
Developing a Roadmap	109
Existing Environment	109
Supported Paths	111
Incompatibilities	112
Required Features	113
Coexistence vs. Interoperability	113
Transitioning and Coexistence	114
Exchange Topologies	114
Prerequisites for a Transition	115
Installing Exchange 2007 into an Existing Organization	118
Transitioning Public Folders	120
Transitioning Mailboxes	121
Coexistence	127
Administration During Coexistence	128
Routing Optimization	128
Mailbox Delegates	129
Resource Accounts	129
Things That Make Exchange 2007 Go, “Huh?”	129
Removing Exchange 2000/2003	131
Migrating	133
Reasons to Migrate	133
Target Organizations	134
Migrating Mail Flow	134
Migrating Recipient and Configuration Information	135
Migrating Exchange Data	136
Migrating from Other Messaging Systems	138
Summary	142

Part III Administering Exchange Server 2007

6	Administering Mailbox Servers	145
	The Role of Mailbox Servers	145
	Service Architecture	146
	Introducing the Microsoft Exchange Information Store Service	146
	The Store.exe Process and Its DLLs	148
	Storage Architecture: Storage Groups, Log Files, and Databases	152
	Storage Groups	152
	Adding Storage Groups	152
	Mailbox Databases	166
	Adding Mailbox Databases	166
	Deleting Mailbox Databases	168
	Mounting and Dismounting Databases	169
	Managing Disconnected Mailboxes	171
	Mailbox Database Properties	172
	Getting More Out of the Mailbox Database Configuration	173
	Renaming a Mailbox Database	174
	Mailbox Database General Settings	175
	Mailbox Database Limits Settings	179
	Relationship Between Mailbox Database and Individual Mailbox Limits	182
	Configuring Continuous Replication	184
	Managing Mailbox Database Properties	184
	Public Folder Databases	188
	Mailbox Configuration	188
	Public Folders	190
	Public Folder Management	190
	Mail-Enabled Public Folders	190
	Summary	191
7	Administering Hub and Edge Transport Servers	193
	The Hub Transport Server Role	193
	The Edge Transport Server Role	194
	Comparing the Hub and Edge Transport Server Roles	194
	Common Transport Server Settings	196
	Accepted Domains	196
	E-mail Address Policies	200
	Remote Domains	207
	Transport Rules	210
	Journaling	210
	Managing Global Settings	211
	Managing Connectors	215
	Managing Receive Connectors	215
	Managing Send Connectors	233
	Managing EdgeSync Subscriptions	240

Managing Queues	245

Summary	253
8 Administering Client Access Servers	255
Deployment Considerations	255
IIS Integration	256
Direct File Access	257
WebReady Document Viewing	261
POP3 and IMAP4	262
Configuration	262
Outlook Anywhere	266
Configuration	267
ActiveSync	270
ActiveSync Mailbox Policies	271
Remote Wipe	276
Recover Password	278
Autodiscover	278
Autodiscover Service and SSL Certificates	280
Split-Brain DNS	287
Changing Autodiscover URLs	288
The Last Solution: Using DNS SRV records	289
Availability Service	291
Cross-site Considerations	291
Cross-forest Free/Busy Information Considerations	293
Summary	294
9 Administering Unified Messaging Servers	295
Understanding Unified Messaging	295
A Brief History of Unified Messaging	296
Voice Primer for Exchange Administrators	296
Exchange Unified Messaging Features	301
Exchange Unified Messaging Architecture	303
Deploying Unified Messaging Servers	306
Hardware	306
Deployment Process	307
Unified Messaging Coexistence and Migrations	308
PBX and IP Gateways vs. IP PBXs	309
Legacy PBX and IP Gateways	309
IP PBX	310
Configuring Unified Messaging Servers	311
Dial Plans	312
UM IP Gateway	313
UM Mailbox Policy	315
UM Hunt Group	316
UM Dialing Rules	317
Assigning UM Dialing Rules to a Mailbox Policy	319
Generating GAL Grammar	321

Unified Messaging Users	322
UM-Enabling Users	322
Summary	324

Part IV Exchange Recipients and Clients

10 Administering Recipients	327
Exchange Takes Over Recipient Management: Goodbye RUS!	327
Which Tool Do I Use to Manage Recipients?	329
The Exchange Recipient Bandwagon	329
Creating a Mailbox	331
Creating a New Mailbox in Exchange Shell	333
Creating a Mailbox for an Existing User Account	334
Bulk-Creation of Mailboxes	334
Removing Mailboxes	335
Really Removing a Mailbox: Mailbox-Disabling a User Account	335
Creating Mail Users	335
Removing a Mail User	336
Creating a Mail Contact	336
Removing a Mail Contact	337
Creating Distribution Groups	338
Adding Members to a Distribution Group	339
Creating Dynamic Distribution Groups	340
Disconnected Mailboxes	345
Reconnecting a Disconnected Mailbox	345
Moving Mailboxes	346
Cross-Forest Mailbox Moves	349
Managing Mailboxes	350
Mailbox Features	350
Managing Mailbox Settings	351
Mailbox Storage Quotas	353
Reporting on Mailbox Quotas and Mailbox Sizes	355
Modifying Deleted Item Retention Settings	356
Mail Flow Settings	356
Changing the Default E-mail Address	361
Managing Send As and Full Mailbox Access Permissions	362
Managing Distribution Groups	362
Summary	364
11 Outlook 2007	365
Feature Overview	365
New Office 2007 Ribbon	365
Word 2007 Is the Standardized Editor	365
Autodiscover Service	366
Cross-forest Improvements	366
Reduction of Network Traffic	367

Productivity Enhancements	367
Instant Search	368
To-Do Bar	368
Integrated RSS	370
Color Categorization and Follow-up Flags	372
Improved Out-of-Office Settings	373
Scheduling and Calendar Improvements	374
Increased Room for Outlook Rules	377
Unified Messaging and Instant Messaging Integration	377
Electronic Business Cards	378
Security Enhancements	379
Outlook E-mail Postmark	379
Message Classifications	379
Trust Center	382
Document Attachment Preview	383
Safelist Aggregation	384
Auto-Encryption	384
Managed E-mail Folders	385
Mailbox Cleanup	385
Deploying Outlook 2007	387
System Requirements	387
Deployment Options	387
Configuring Profiles	392
Auto Account Setup	392
Outlook Profile Files (.prf)	393
Additional Outlook Configurations	395
Cached Exchange Mode	395
Outlook Anywhere	396
Offline Address Book	397
Custom Outlook Forms	399
Windows SharePoint Services v3	399
Programming Outlook and Exchange	399
Summary and Resources	399
12 Outlook Web Access 2007	401
The New Outlook Web Access	401
OWA Components	401
OWA Installation	402
Outlook Web Access Light	402
OWA Premium Client Experience	403
Logon Screen	404
Interface and Navigation	405
Responsiveness	406
Calendar Improvements	408
WebReady Document Viewing	409
Browsable Address Book	412
Personal Distribution Lists	412

SharePoint and Document Shares	413
Improved Search	413
Change Password	415
Other Minor Changes to OWA 2007	415
Backward Compatibility and Interoperability	418
OWA Configuration and Administration	418
Exchange Management Console	418
Exchange Management Shell	424
Internet Information Service (IIS) Manager	427
Registry Editor	427
web.config	428
OWA Security Features	429
OWA and ISA: Better Together	429
Microsoft Forefront Security	430
Public versus Private Computer	430
Secure Sockets Layer	430
Advanced Features	431
Segmentation	431
GZip Compression	431
Web Beacons	431
Customizing OWA	432
Logon and Logoff Screens	432
